News Release

AMKOR REPORTS THIRD QUARTER 2002 RESULTS

ASSEMBLY & TEST REVENUES RISE 12% OVER SECOND QUARTER, EXCEEDING GUIDANCE

CHANDLER, AZ. -- October 29, 2002 -- Amkor Technology, Inc. (Nasdaq: AMKR) reported third quarter assembly and test revenue of \$394 million, up 12% from the second quarter of 2002 and exceeding the company's previous expectations. Third quarter wafer fab revenue was \$60 million compared with \$59 million in the second quarter. Total revenue was \$454 million, up 11% sequentially and up 36% over the prior year period. Third quarter gross margin rose to 11.5% from 3% in the second quarter and negative 3.5% in the third quarter of 2001.

Amkor's third quarter net loss was \$59 million, or (\$0.36) per share, and included \$11 million in after-tax charges associated with factory consolidation and operating efficiency initiatives. Excluding these charges, Amkor's third quarter net loss was \$48 million, or (\$0.29) per share. For the third quarter of 2001, Amkor's net loss, excluding the amortization of goodwill, was \$100 million, or (\$0.62) per share.

"During the third quarter we took an important step in our goal of monetizing our investment in Anam Semiconductor with the sale of 20 million ASI shares to Dongbu," said James Kim, Amkor's chairman and chief executive officer. "We received \$59 million as the initial payment from the transaction, increasing our cash balance to \$235 million. Our ownership interest in ASI has been reduced to 21%, and with additional monetization of this investment we are confident that our cash resources will continue to increase. More significantly, we achieved positive cash flow during the third quarter, which is sooner than we had anticipated."

"Our core assembly and test business has increased 36% since the first quarter, which is a testament to the strength of the outsourcing trend and Amkor's leading market position," said John Boruch, Amkor's president and chief operating officer. "During the year we have steadily gained market share, which we attribute to our strong customer relationships, geographically diversified operations and outstanding product & technology portfolio."

"We have seen continued strength in our MicroLeadFrame(TM) package, which is becoming widely adopted for a broad range of cellular, wireless LAN and standard logic applications. With more than 50 customers designing into MLF, Amkor is the clear industry leader. Our MLF capacity now exceeds 15 million units per week."

"We also expect increased adoption of other advanced packaging solutions such as flip chip, system in package and stacked chips, where Amkor enjoys strong market positions," said Boruch.

Amkor Reports Third Quarter 2002 Results

FINANCIAL HIGHLIGHTS

"Our third quarter gross margin of 11.5% exceeded expectations and represents a significant improvement over the past several quarters," said Ken Joyce, Amkor's chief financial officer. "Gross margin has increased by more than 1500 basis points from the trough of negative 4% in the first quarter of 2002, reflecting higher revenue levels and ongoing reductions in fixed costs."

"Our operating loss, before special charges, improved to \$4 million from \$49 million in the second quarter, reflecting higher revenue levels and lower depreciation and operating expenses," said Joyce.

"During the quarter, we commenced consolidation of our two Taiwan manufacturing operations into a single, scalable facility as part of a planned effort to enhance operational efficiencies. In connection with this and other cost reduction efforts, we recognized \$14 million pre-tax (most of which is non-cash) in facility exit expenses," said Joyce.

Third quarter EBITDA rose to \$71 million from \$48 million in the second quarter. We have calculated EBITDA as earnings before income taxes; special charges; equity in income (loss) of affiliates; minority interest; foreign currency gain or loss; interest expense, net; depreciation and amortization; loss on disposal of assets; and loss on impairment of equity investment. EBITDA is a common measure used by investors to evaluate a company's ability to service debt. EBITDA is not defined by generally accepted accounting principles, and our definition of EBITDA may not be comparable to similar companies.

Capital expenditures were \$31 million for the third quarter. Depreciation and amortization totaled \$77 million. "Our capital budget for 2002 remains in the neighborhood of \$100 million," noted Joyce.

"We enter the fourth quarter with enhanced financial liquidity," said Joyce. "We have \$235 million in cash at September 30, compared with \$162 million at June 30. This increase reflects a \$60 million initial payment on the sale of 20 million shares of Anam Semiconductor, Inc. to Dongbu, together with the generation of \$13 million in positive cash flow during the quarter. As previously announced, during Q3 our bank group agreed to extend the covenants in our credit facility for an additional year, which reflects a strong vote of confidence from our lenders."

#### BUSINESS OUTLOOK

Visibility in our industry remains cloudy. On the basis of customers' forecasts, we currently expect fourth quarter assembly & test revenue to be around 5% lower than the third quarter. Wafer fab revenue should be around \$50 million.

#### Amkor Reports Third Quarter 2002 Results

Effective with the fourth quarter of 2002, Amkor will change the estimated useful lives of certain of its assembly equipment from four years to seven years for depreciation purposes, which is in line with the practice used by other companies in our industry. Amkor will not extend the useful lives of the assembly equipment associated with the second quarter impairment charge. This change is expected to reduce depreciation expense by approximately \$18 million per quarter. We expect that as a result of this change, together with ongoing cost efficiency programs, fourth quarter gross margin will improve to around 13%.

Amkor will be holding a conference call on October 29 at 5:00 p.m. eastern time to discuss the results of the third quarter in more detail and to provide additional guidance for the fourth quarter of 2002. The call will be webcast and can be accessed through our web site: [www.amkor.com](http://www.amkor.com), and through CCBN's website, [www.companyboardroom.com](http://www.companyboardroom.com).

Amkor Technology, Inc. is the world's largest provider of contract semiconductor assembly and test services. The company offers semiconductor companies and electronics OEMs a complete set of microelectronic design and manufacturing services. More information on Amkor is available from the company's SEC filings and on Amkor's web site: [www.amkor.com](http://www.amkor.com).

The statements by James Kim, John Boruch and Ken Joyce, and the above statements contained in our Business Outlook, are forward-looking statements that involve a number of risks and uncertainties. Factors that could affect future operating results and cause actual results to vary materially from historical and expected results include, but are not limited to: the highly unpredictable nature of the semiconductor industry; volatility of consumer demand for products incorporating our semiconductor packages; worldwide economic effects of the recent terrorist attacks on the United States and the United States military actions in response; competitive pricing and declines in average selling prices; dependence on our relationship with ASI for all of our wafer fabrication output; reliance on a small group of principal customers; timing and volume of orders relative to the production capacity; availability of manufacturing capacity and fluctuations in manufacturing yields; availability of financing; competition; dependence on international operations and sales; dependence on raw material and equipment suppliers; exchange rate fluctuations; dependence on key personnel; difficulties in managing growth; enforcement of intellectual property rights; environmental regulations; and the results of ASI through the equity method of accounting.

Further information on risk factors that could affect the outcome of the events set forth in these statements and that would affect the company's operating results and financial condition is detailed in the company's filings with the Securities and Exchange Commission, including the Report on Form 10-Q for the three months ended June 30, 2002.
